SUMMARY

Operations and quality specialist who worked as the analyst behind the numbers: roughly 200,000 patient contacts a month turned into KPIs, metrics, and reporting. Five and a half years at Sono Bello, from Patient Ambassador to PAC Operations Specialist. I built two quality programs from scratch and used NICE Interaction Analytics to learn from every patient call, then turned that into scripting, training, and recommendations for leadership. I also build software with AI tools, backed by automated tests and quality checks. Seeking a remote data analytics, BI, or development role.

SKILLS

Data & Analytics: Power BI, Excel (MOS certified), Python, Interaction Analytics, sentiment and trend analysis, data visualization, KPI reporting, data-quality checks, root-cause analysis

Quality & Operations: QA program design, scorecards, SOPs, operational audits, process improvement, training and development

Platforms: NICE CXone, NICE Interaction Analytics, Zenoti, SharePoint, Oracle, QuickBooks

Software: Swift/SwiftUI, Python, C#, JavaScript, Zig, AI-assisted development (Claude Code, Codex), automated testing and CI

EXPERIENCE

Sono Bello

PAC Operations Specialist · Remote

Jul 2025 – Sep 2026

- Ran quality operations for the Patient Ambassador Center, connecting how we talked to patients with consultation, booking, and transformation rates. Reported to the VP of Project Management and presented to C-suite leadership.
- Analyzed roughly 200,000 contacts a month and the conversations behind them, turning them into KPIs and metrics, and built Excel reporting used by the entire team.
- Served as the go-to expert on NICE CXone and Interaction Analytics, configuring and testing tools for QA automation, sentiment tracking, and performance flagging.
- Set things up so we learned from every patient contact, not just a sample. Showed marketing how display, web, and search leads behave differently once they call, and found that calls focused on getting patients scheduled booked better than calls built around soft skills.
- Pulled Power BI reporting and made it easier for frontline teams to understand. Every recommendation I brought to leadership came with the data and sources behind it.

Quality Assurance Ambassador

Oct 2021 – Jul 2025

- Built two quality management programs from scratch, growing annual evaluations from about 6,000 to over 20,000.
- Implemented NICE Interaction Analytics for automated quality monitoring, sentiment tracking, and trend identification.
- Designed scorecards and guidelines for the Consult Specialist and Patient Ambassador teams, and ran audits across departments and locations using IC and Zenoti reporting.
- Assisted in the growth of 110+ employees a month and presented QA insights to C-level executives.

Show Specialist

Aug 2021 – Oct 2021

- Handled the calendars for three large centers and covered others as needed, tracking show-rate, cancellation, and sold-rate KPIs.

Patient Ambassador

Apr 2021 – Aug 2021

Earlier: Operations Manager, GoEbits (2020–21) · Assistant Manager, Cash America (2019–20) · Account Coordinator, ReedHein & Associates (2016–17) · Lead Customer Service Specialist, Nordstrom Direct (2014–16)

INDEPENDENT PROJECTS

- **Nightproof** (Swift, SwiftUI). Paid iPhone and Apple Watch app on the App Store that locks risky apps behind a focus challenge on a night out. No account, no servers, no data collected.
- **Gameplay Data Pipeline** (Python, C#). Collects opted-in players' fight recordings, anonymizes names with salted hashes, and runs a daily data-quality report.
- **Game Preservation Database** (Python, SQLite). About 264,000-row relational database loaded by Python import scripts.
- **Clarity and KyanOS** (Clarity, Zig, C). Self-compiling programming language, v1.0.1 for macOS, Linux, and Windows, with about 68,000 lines and 64 passing test suites.
- **TheAbhorrent** (Unreal Engine 5). Co-op horror game with server-authoritative networking and proximity voice chat. Mac alpha passes 29 of 29 automated travel checks.
- **Hearth** (Swift, Apple MLX). Mac app that runs language models fully on-device, including image generation and voice.
- **Accessibility Plugins** (C#). Two Final Fantasy XIV plugins for players with physical limitations or who cannot use voice chat.

EDUCATION, CERTIFICATIONS & AWARDS

Academy of Art University, Multi-Media Communications (two years of study)

Certifications: NCAP, NICE CXone Interaction Analytics (2024) · Microsoft Office Specialist · QuickBooks Certified User · Apple Developer

Awards: Growth Mindset Trailblazer Award, Sono Bello (2026) · PAC Impact Award Nominee, Sono Bello (2025)
