PROFESSIONAL SUMMARY

Operations and quality professional working in data analysis and AI and ML-driven interaction analytics. I build quality programs from the ground up and turn conversation and performance data into training, scripting, and strategy for leadership. In my current role I grew evaluation output from about 6,000 to over 20,000 assessments a year and report findings directly to C-suite leadership. I am the subject-matter expert on NICE CXone and Interaction Analytics. I am also a published Apple developer, so I build the AI, analytics, and automation tools most people in my field can only configure. Open to operations, quality, data, and analytics roles, on-site or remote.

CORE SKILLS

Analytics & Data: Interaction Analytics, machine-learning models, sentiment and trend analysis, business intelligence, data visualization, root-cause analysis, KPI reporting

Quality & Operations: QA program design, scorecard development, SOPs, operational audits, process and continuous improvement

Platforms & Tools: NICE CXone, NICE Interaction Analytics, Zenoti, Microsoft Excel (certified), Microsoft Office Specialist, SharePoint, QuickBooks, Oracle

Software & AI Engineering: Swift and SwiftUI, Python, TypeScript and Node.js, Rust, iOS and macOS apps, local LLM inference, agentic tool-calling, REST APIs

Leadership: Team coaching and training (110+ staff per month), C-suite presentation, cross-department coordination, recruiting and onboarding

PROFESSIONAL EXPERIENCE

PAC Operations Specialist, Sono Bello

Jul 2025 to Present

- Own quality operations across the Patient Ambassador Center, connecting interaction quality to consultation, booking, and transformation rates. Report to the VP of Project Management and present strategy to C-suite leadership.
- Serve as the subject-matter expert on NICE CXone and Interaction Analytics, configuring and iterating tooling for QA automation, sentiment tracking, and performance flagging.
- Run analysis with Interaction Analytics and machine-learning models to surface trends, unaddressed patient concerns, and regional operational gaps, then turn what I find into scripting, training, and process improvements.

Quality Assurance Ambassador, Sono Bello

Oct 2021 to Jul 2025

- Built two quality programs from the ground up, growing annual evaluation output from about 6,000 to over 20,000 assessments.
- Implemented and operationalized NICE Interaction Analytics for automated quality monitoring, sentiment tracking, and trend identification.
- Designed scorecards and guidelines for the Consult Specialist and Patient Ambassador teams, and ran cross-location operational audits using IC and Zenoti reporting.
- Coached 110+ employees a month and presented QA insights to C-level executives.

Patient Ambassador / Consult Specialist, Sono Bello

Apr 2021 to Sep 2021

- Managed surgical and consult calendars for three large surgical centers, tracking show-rate, cancellation, and sold-rate KPIs with close attention to health-screening accuracy.

Earlier: Store Manager, GoEbits (2020-21) · Assistant Manager, Cash America (2019-20) · Account Coordinator, Reedhein & Associates (2016-17) · Lead Customer Service Specialist, Nordstrom Direct (2014-16).

SOFTWARE & AI ENGINEERING, INDEPENDENT DEVELOPER

ShouldI: Drunk Mode (*Swift, SwiftUI*). A paid, privacy-first iOS app I shipped to the App Store, live on iPhone, iPad, Mac, and Apple Watch. Uses Apple Screen Time APIs and on-device challenges, with no data collection.

Hearth (*Swift, Apple MLX*). A macOS app that runs language models fully on-device, with chat, image generation, voice, and tool-calling. Includes a from-scratch OpenAI-compatible HTTP server and real-time tool-call parsing for local models that don't follow the spec.

Clarity (*Clarity, Python, Zig*). A programming language I built from scratch whose full toolchain (lexer, parser, interpreter, optimizing bytecode VM) is written in the language itself. Companion Zig micro-kernel and experimental OS in progress.

PacketMonkey (*Electron, Node, SQLite, SwiftUI*). A cross-platform binary and protocol analysis tool with hex annotation, endian-aware decoding, capture diffing, and AI-assisted analysis, served to a desktop app and a native iOS companion from one backend.

EDUCATION

Academy of Art University, Multi-Media Communications (two years of study)

AWARDS

Growth Mindset Trailblazer Award, Sono Bello (2026)

PAC Impact Award Nominee, Sono Bello (2025)

CERTIFICATIONS

Apple Developer Program

NICE CXone Interaction Analytics (NCAP), 2024

Microsoft Office Specialist (Excel, PowerPoint, Word)

QuickBooks
