SUMMARY

Data and quality professional with five and a half years at Sono Bello, where I grew from Patient Ambassador to PAC Operations Specialist. I built two quality programs from scratch and used NICE Interaction Analytics to learn from every patient call, then turned what I found into scripting, training, and recommendations for leadership. I also build software with AI coding tools. Looking for a remote role in data analytics, business intelligence, or development.

SKILLS

Data & Analytics: SQL, Power BI, Excel (MOS certified), Python, SQLite, Interaction Analytics, sentiment and trend analysis, data visualization, KPI reporting, data-quality checks, root-cause analysis

Quality & Operations: QA program design, scorecards, SOPs, operational audits, process improvement, training and development

Platforms: NICE CXone, NICE Interaction Analytics, Zenoti, SharePoint, Oracle, QuickBooks

Software: Swift and SwiftUI, Python, C#, JavaScript and Node, Zig, AI-assisted development (Claude Code, Codex), local LLM tools

EXPERIENCE

Sono Bello

PAC Operations Specialist · Remote

Jul 2025 – Sep 2026

- Ran quality operations for the Patient Ambassador Center, connecting how we talked to patients with consultation, booking, and transformation rates. Reported to the VP of Project Management and presented to C-suite leadership.
- Served as the go-to expert on NICE CXone and Interaction Analytics, configuring and testing tools for QA automation, sentiment tracking, and performance flagging.
- Set things up so we could learn from every patient contact, not just a sample. Showed marketing how display, web, and search leads behave differently once they call, and found that calls focused on getting patients scheduled booked better than calls built mostly around soft skills.
- Pulled Power BI reporting and made it easier for frontline teams to understand.

Quality Assurance Ambassador

Oct 2021 – Jul 2025

- Built two quality management programs from scratch, growing annual evaluations from about 6,000 to over 20,000.
- Implemented NICE Interaction Analytics for automated quality monitoring, sentiment tracking, and trend identification.
- Designed scorecards and guidelines for the Consult Specialist and Patient Ambassador teams, and ran audits across departments and locations using IC and Zenoti reporting.
- Assisted in the growth of 110+ employees a month and presented QA insights to C-level executives.

Show Specialist

Aug 2021 – Oct 2021

- Handled the calendars for three large centers and covered other centers as needed, tracking show-rate, cancellation, and sold-rate KPIs with close attention to health-screening accuracy.

Patient Ambassador

Apr 2021 – Aug 2021

Earlier: Operations Manager, GoEbits (2020–21) · Assistant Manager, Cash America (2019–20) · Account Coordinator, ReedHein & Associates (2016–17) · Lead Customer Service Specialist, Nordstrom Direct (2014–16)

INDEPENDENT PROJECTS

- **Nightproof** (Swift, SwiftUI). Paid iPhone and Apple Watch app on the App Store that locks risky apps behind a focus challenge on a night out. No account, no servers, no data collected.
- **Gameplay Data Pipeline** (Python, C#). Collects opted-in players' fight recordings, anonymizes names with salted hashes, and runs a daily data-quality report.
- **Game Preservation Database** (Python, SQLite). About 264,000-row relational database loaded by Python import scripts.
- **Clarity and KyanOS** (Clarity, Zig, C). Self-compiling programming language, v1.0.1 for macOS, Linux, and Windows, with about 68,000 lines and 64 passing test suites.
- **TheAbhorrent** (Unreal Engine 5). Co-op horror game with server-authoritative networking and proximity voice chat. Mac alpha passes 29 of 29 automated travel checks.
- **Hearth** (Swift, Apple MLX). Mac app that runs language models fully on-device, including image generation and voice.
- **Accessibility Plugins** (C#). Two Final Fantasy XIV plugins for players with physical limitations or who cannot rely on voice chat.

EDUCATION, CERTIFICATIONS & AWARDS

Academy of Art University, Multi-Media Communications (two years of study)

Certifications: NCAP, NICE CXone Interaction Analytics (2024) · Microsoft Office Specialist · QuickBooks Certified User · Apple Developer

Awards: Growth Mindset Trailblazer Award, Sono Bello (2026) · PAC Impact Award Nominee, Sono Bello (2025)
